

AI for RaumKraft

Transparent. Practical. Measurable.

Prepared for Chleo, CEO • RaumKraft Immobilien & Design

Kimia Asgari | Ironhack AI Consulting Bootcamp 2026

RaumKraft Today

150

Employees

4 regional offices

200

Listings / month

Each takes 30-45 min to write

8.5h

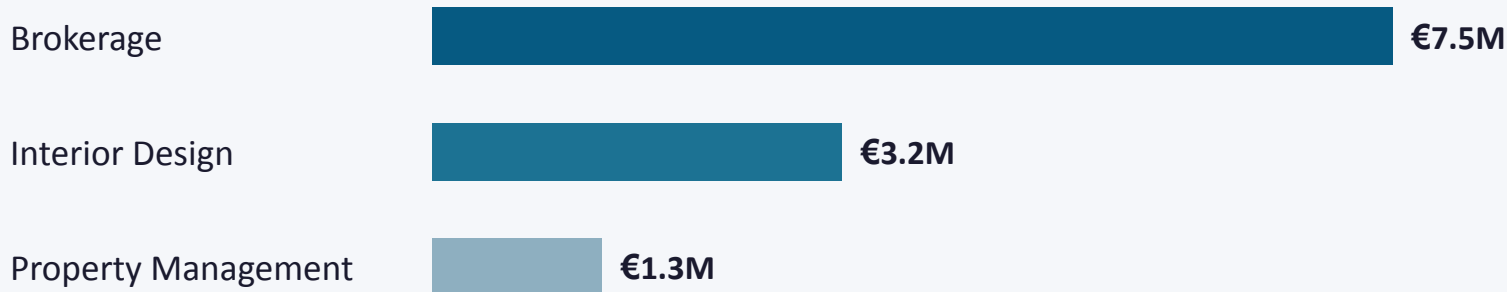

Avg response time

Target: under 2 hours

Chleo's concern: "AI is simply not transparent — what is it doing?"

Where Time Is Lost: Enquiries

Three AI Use Cases

Listing Generation

PRIMARY

Property data → AI draft → agent reviews → publish

Structured property data (size, rooms, location, energy class, features) goes in → LLM generates a polished German listing (headline, lifestyle paragraph, key facts, neighbourhood note, CTA, 150–200 words) → agent reviews and edits → publish.

Client Enquiry Triage

SECONDARY

Auto-classify → draft response → human agent approves → send

Incoming enquiries (email, contact forms) get auto-classified by type (viewing request, price question, general info, complaint, etc.) → AI drafts a response → human agent reviews and approves before sending.

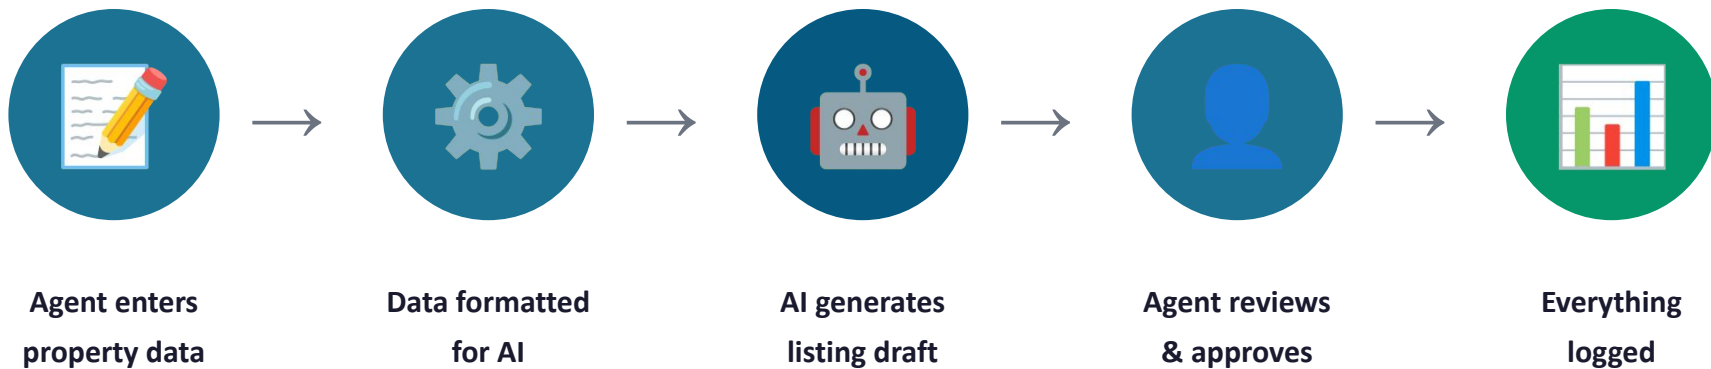

Design Brief Generator

FUTURE

Meeting notes → structured brief → designer refines

Meeting notes from a client consultation go in → AI extracts and structures them into a formal design brief (room, style preferences, budget, constraints, timeline) → designer reviews and refines. (**Nice-to-have extension:** AI mood board concept generator: The extracted brief data + a photo of the room are fed to a generative AI, which returns two decoration and furniture ideas. The client picks their preferred option, and that choice shapes the full design brief going forward.)

How It Works

Transparency = Trust

- ✓ Every prompt and response logged in LangSmith
- ✓ Human reviews every output before it goes live
- ✓ Costs tracked per call — no surprise bills

Impact & Investment

Estimated opportunity (based on current volumes)

250h

Hours saved on listings / year

500 listings × 30 min

69%

Enquiries eligible for auto-draft

routine types

240h

Brief hours saveable / year

80 projects × avg 3h

~1 mo

Payback period

€12–15k upfront → €15–31k/mo
value

Investment

POC setup + consulting **€12–15k**

Monthly running cost **€185–365**

Monthly value created **€15–31k**

Timeline to Production

Wk 1–2 Discovery

Wk 3–5 POC build + demo

Wk 6–9 Pilot (5 agents)

Wk 10–11 Production rollout

Risks We've Addressed

HIGH

AI invents features

Structured input only — AI can't hallucinate what it wasn't given

HIGH

GDPR violation

EU-hosted endpoints + data processing agreements + anonymisation

MED

Staff resistance

Framed as assistant, not replacement. Pilot with volunteers first

LOW

Surprise costs

Per-call monitoring. ~€0.002 per listing. Monthly budget caps

Next Steps

- 1 2-hour discovery session with your sales and design leads
- 2 3-week POC build with RaumKraft data (no client PII)
- 3 4-week pilot with 5 volunteer agents
- 4 Review results — then decide whether to scale

AI doesn't have to be a black box. Let's prove it — together.
