

RaumKraft AI Assistant

Transparent AI for Real Estate & Interior Design

THE CLIENT

RaumKraft Immobilien & Design

Real estate brokerage & interior design — from listing properties to designing living spaces.

~150 **Hamburg**

Employees

Headquarters · 4 offices

A premium brand experience

RaumKraft positions itself at the intersection of real estate rigor and interior design warmth — reflected in every client touchpoint, from listing to move-in.

avg. client response time

1,200

enquiries per month

"AI is a black box — I need to see what it does before it touches our clients."

— Chleo, CEO · RaumKraft

Three AI Use Cases

1

Listing Generation

Data → AI Draft → Human Review → Publish

PRIMARY

2

Client Response

Enquiry → AI Reply → Human Review → Send

SECONDARY

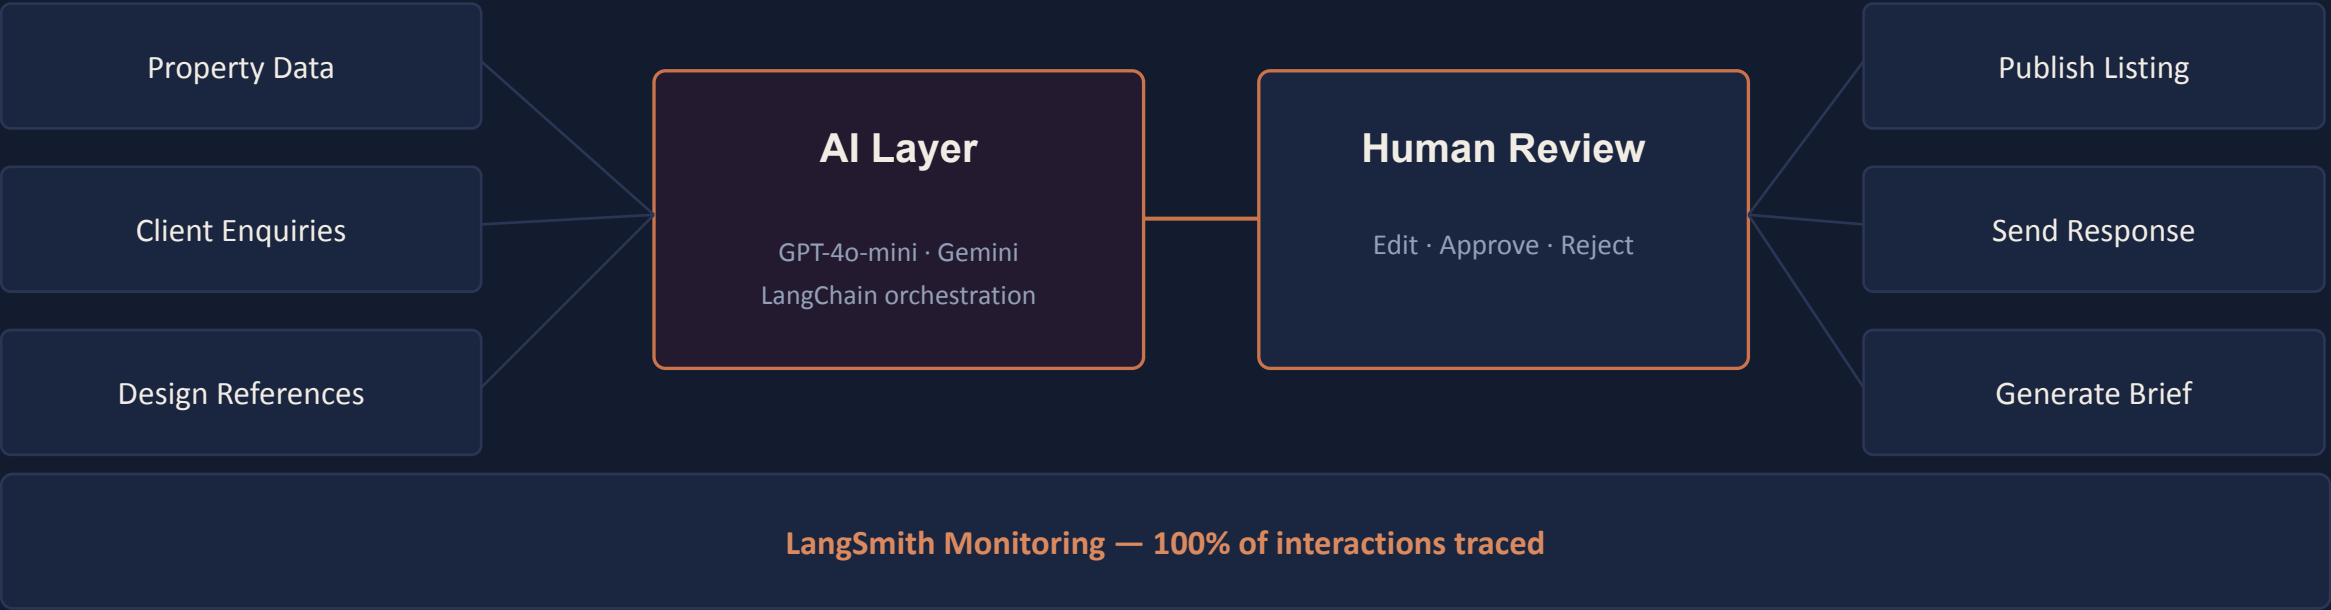

3

Design Briefs

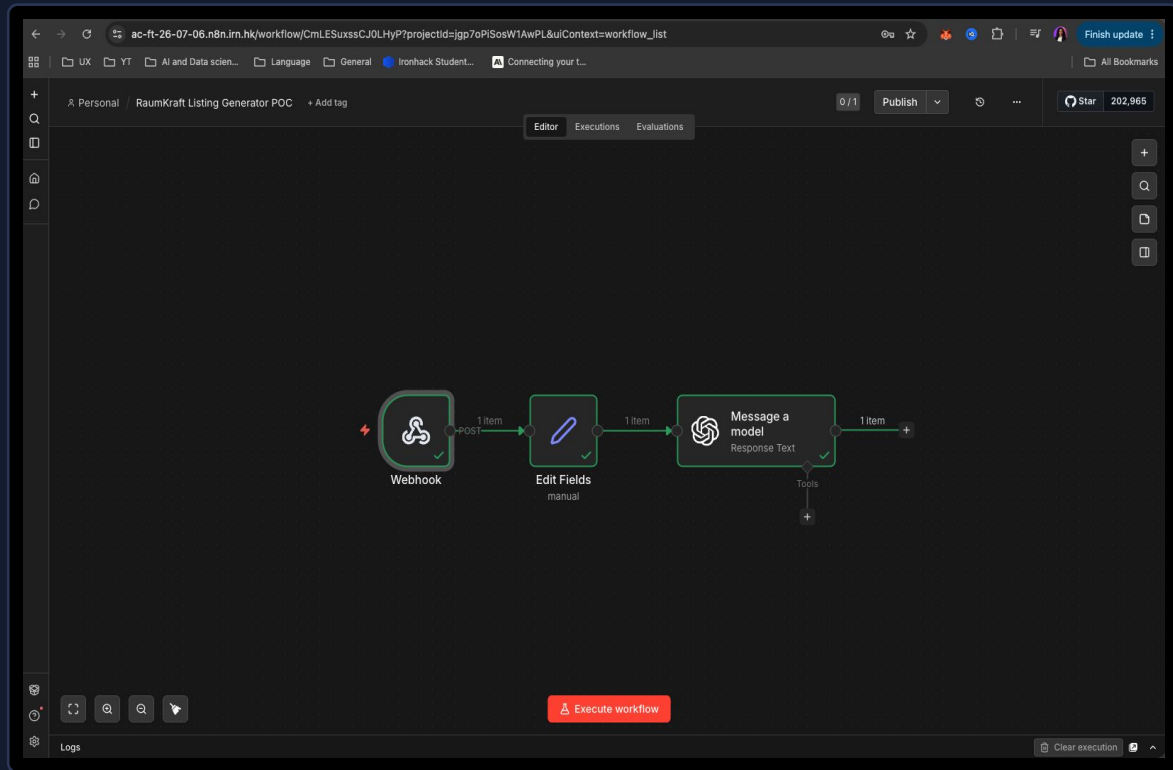

Brief → AI Layout → Designer Review → Refine

FUTURE

System Architecture

From n8n Workflow to Working App

Round 1: n8n workflow — Webhook → Edit Fields → OpenAI

WHAT IT PROVED

GPT-4o-mini generates accurate, structured German listings from property data in under 5 seconds, at a fraction of a cent per listing.

WHY WE UPGRADED

No UI — testable only via API call. Single use case. No cost visibility. Round 1 feedback: UC1 alone is too simple — the MVP needed a real interface, a second use case, and full cost tracking.

MVP: Live Demo

AI-powered tools for RaumKraft Immobilien & Design

Listing Generator (UC1)

Enquiry Triage (UC2)

Design Brief Generator (UC3)

Property Listing Generator

Enter property details → AI generates a polished German listing → you review before publishing.

Property Type

Wohnung (Apartment)

District / Neighbourhood

e.g. Hamburg-Eppendorf

Size (m²)

75

Rooms

3

Floor (e.g. 3 of 5)

3 of 5

Energy Class

B

Asking Price (€)

350000

Features (comma-separated)

e.g. Balkon, Einbauküche, Fußbodenheizung, Aufzug

Target Audience

General

Neighbourhood Notes (optional)

e.g. Near Eppendorfer Baum, cafés, park nearby

Generate Listing

RaumKraft AI Assistant

AI-powered tools for RaumKraft Immobilien & Design

Listing Generator (UC1)

Enquiry Triage (UC2)

Design Brief Generator (UC3)

Client Enquiry Triage

Paste a customer enquiry → AI classifies it and drafts a response → you review before sending.

Paste the customer enquiry here

e.g. Guten Tag, ich interessiere mich für die 3-Zimmer-Wohnung in Eppendorf, ist eine Besichtigung am Samstag möglich?

Response language

German (Deutsch)

Classify & Draft Response

RaumKraft AI Assistant

AI-powered tools for RaumKraft Immobilien & Design

Listing Generator (UC1)

Enquiry Triage (UC2)

Design Brief Generator (UC3)

Design Brief Generator

Paste meeting notes from a client consultation → AI extracts a design brief → generates per-room prompts → optionally creates mood boards with Gemini AI.

Paste meeting notes / consultation transcript here

e.g. Met with Mr. and Mrs. Keller about their apartment in Winterhude. They want a modern style for the living room and kitchen...

Brief language

German (Deutsch)

Extract Design Brief

658%

ROI at 36 months

Top Risks & Mitigations

● HIGH

Data Privacy

DPIA completed, all data encrypted in transit and at rest, EU-hosted models

● MEDIUM

Staff Adoption

Phased rollout with 5–8 agents first, built-in feedback loop, training sessions

● MEDIUM

AI Hallucination

Mandatory human review gate on every output — nothing reaches a client unreviewed

Regulatory Compliance

EU AI ACT

Limited Risk — Compliant

Transparency obligations met. All AI-generated content clearly labelled. Human oversight on every decision.

WHAT WE TRIED

4 Gemini model versions tested for AI image generation — each returned a different error: deprecated models, a country-restriction error, and a zero-quota error on the free tier. Whether paid billing resolves the country restriction remains unverified.

GDPR

DPIA Complete

Data Protection Impact Assessment filed for highest-risk processing. EU-hosted OpenAI endpoints. Right to erasure supported.

WHAT WE CHOSE INSTEAD

Gemini's vision + text analysis reads the room photo against the brief and produces a detailed design concept — palette, materials, furniture, layout. A deliberate engineering trade-off, documented transparently rather than hidden.

Implementation Roadmap

COMPLETE

WEEKS 4–11

WEEKS 12–18

WEEKS 19–30

POC + MVP

3 use cases built & tested, live app deployed

Pilot

5–8 agents in Hamburg

Deployment

Full team rollout

Scale

Additional offices & use cases

PILOT SUCCESS CRITERIA — GREENLIGHT TO DEPLOY

- Listing time under 10 min
- Response time under 2 hrs
- ≥70% agent adoption
- ≥85% listings published with minor/no edits

GO-TO-MARKET & COMMERCIALISATION

Internal tool first — no licensing cost, ~€400/month. Longer term: SaaS for other mid-sized German real estate firms, €500–1,500/month by scale.

AI is not a black box.

€74k/year value

275% ROI

Fully compliant

Next step: an 8-week pilot with 5–8 real estate agents in Hamburg
